KODULAR

Much more than a modern app creator without coding
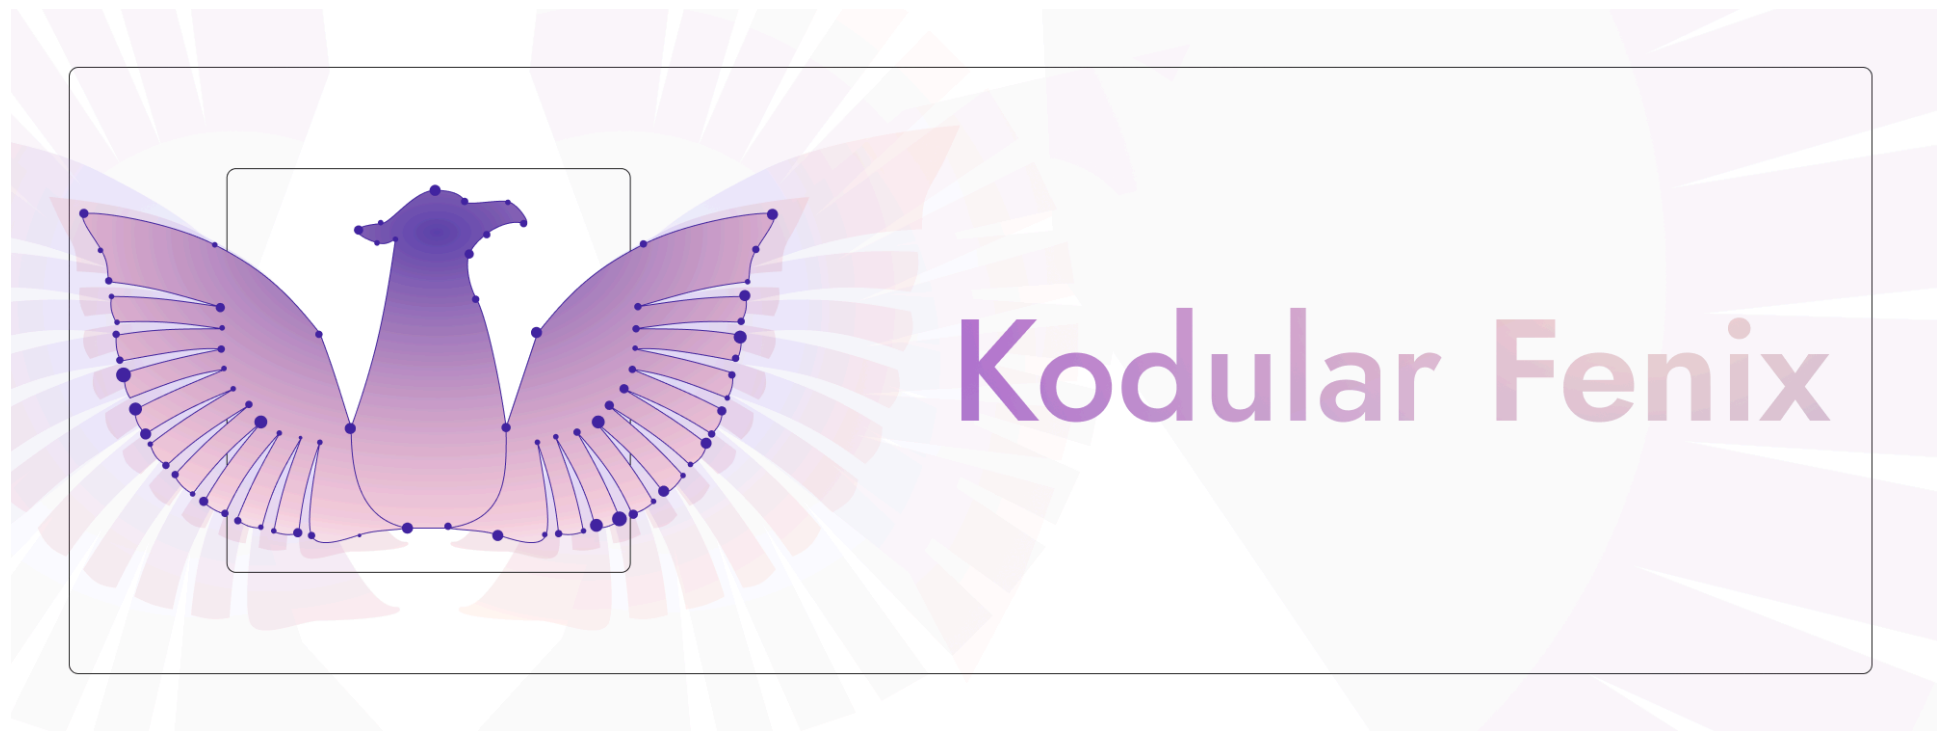

CREATE APPS!   + SEE MORE

Kodular, powerful tools for you

We provide several "modules" (services) to create Android apps without coding, just scroll down a little bit to check them!

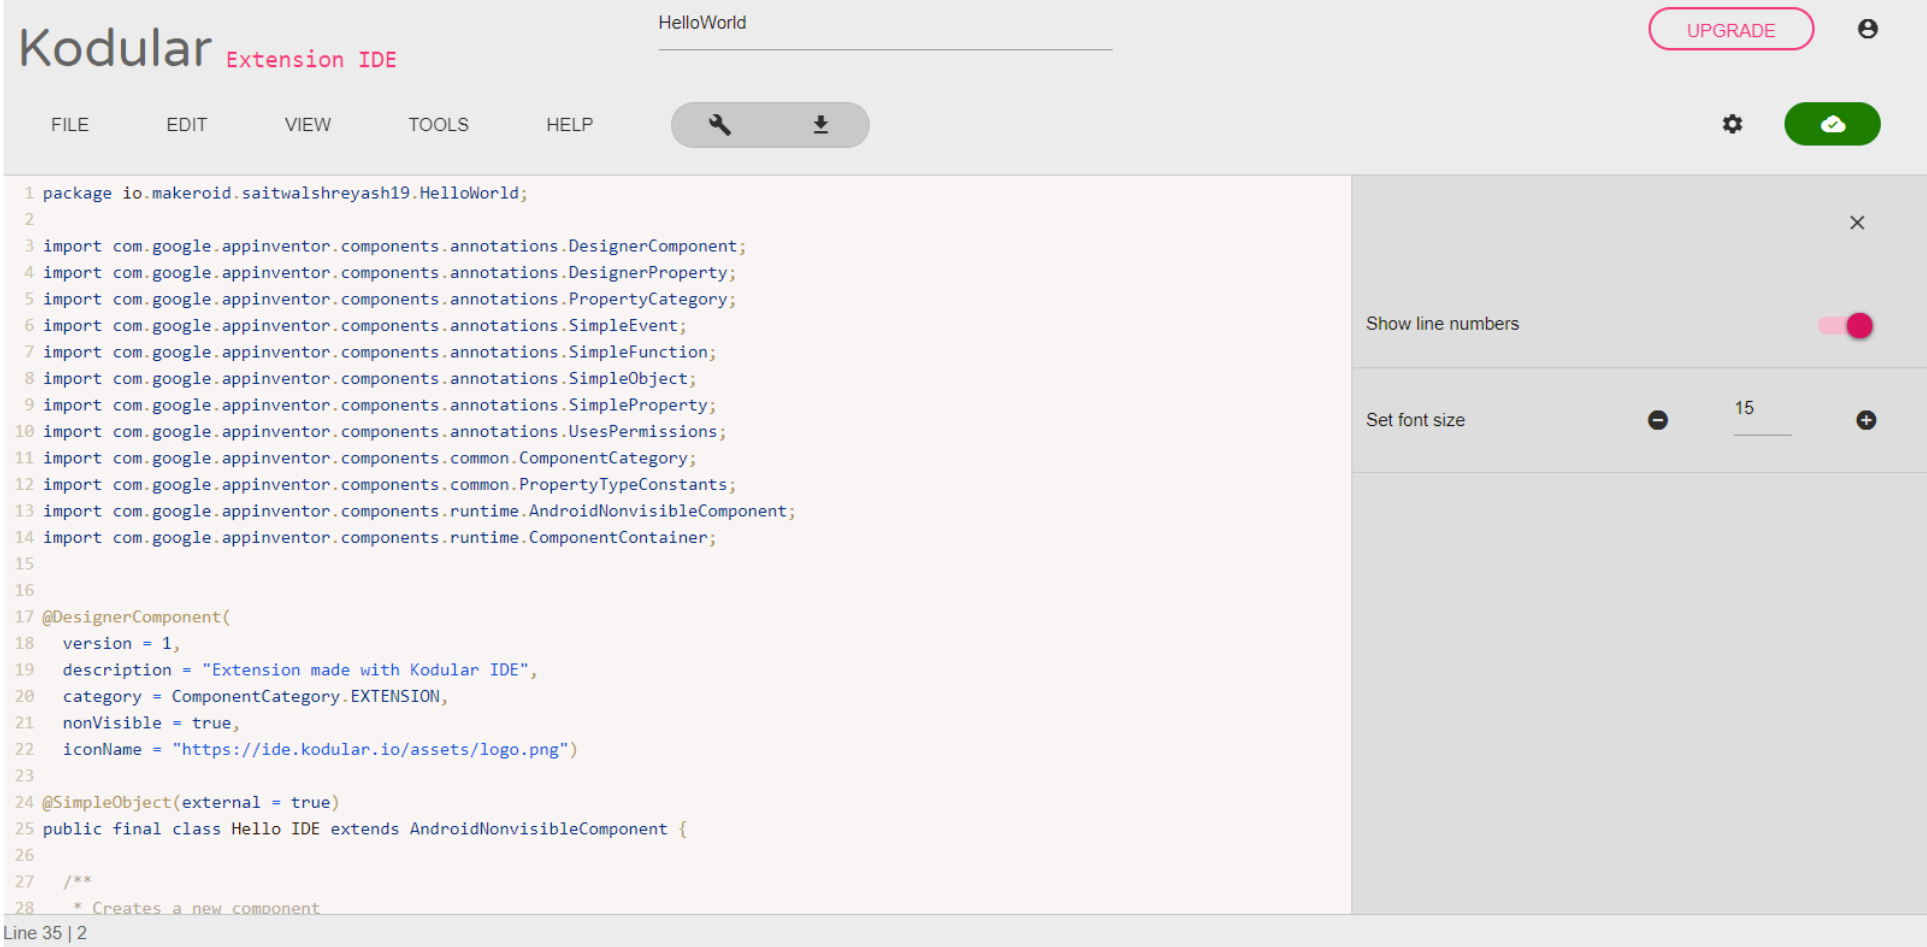

Our Modules

Getting Started | Kodular Creator

Kodular Creator

With Kodular Creator, you can start creating incredible apps without any coding knowledge!
Just drag some components and join blocks

If you are unable to use Kodular, you can check if there's any problem with our servers.

CHECK STATUS

Why is it so great?

Active Community

Why not take a look at our amazing community?
Our users are just amazing, and thanks to them our community is a really nice place to share your doubts, projects or suggestions releated with Kodular.

Our Team

Our Team is very enthusiastic and loves helping people. They will really like to help you on the road to create an app.
We are devotees of the IT!

Maximum Stability

Kodular Infrastructure is powered by our partner ArubaCloud, which guarantees a really good uptime and performance.

Other Services!

We provide more than just an App Creator. We also have a self-developed App Store, an online Extensions IDE and an Account Control Panel
Let's expand Kodular!

Testimonials

Read what our users say about Kodular.

Kleyber Derick

❝ I am greatly surprised to see the level where Kodular has reached and I'm sure this is only the beginning of a GREAT tool.
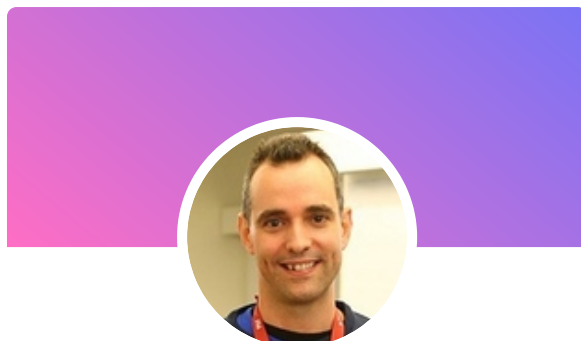

Jose Luis Núñez

❝ Easy, powerful and highly customizable. Kodular takes your Android apps to the next level! Their developers are really active on the community, listening to users and implementing ideas
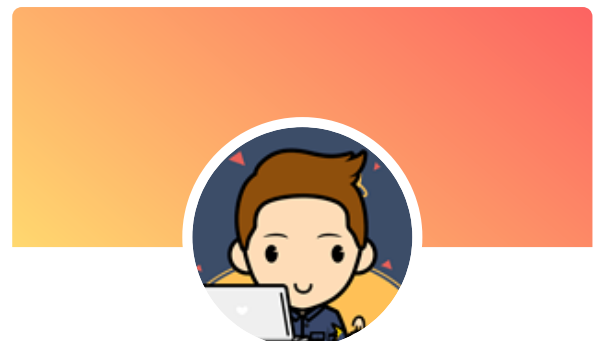

Daniel Vanko

❝ When users start creating such useful and well-designed apps like Koders do, you really should think that you have done something good.
